Growth Corridor Finland

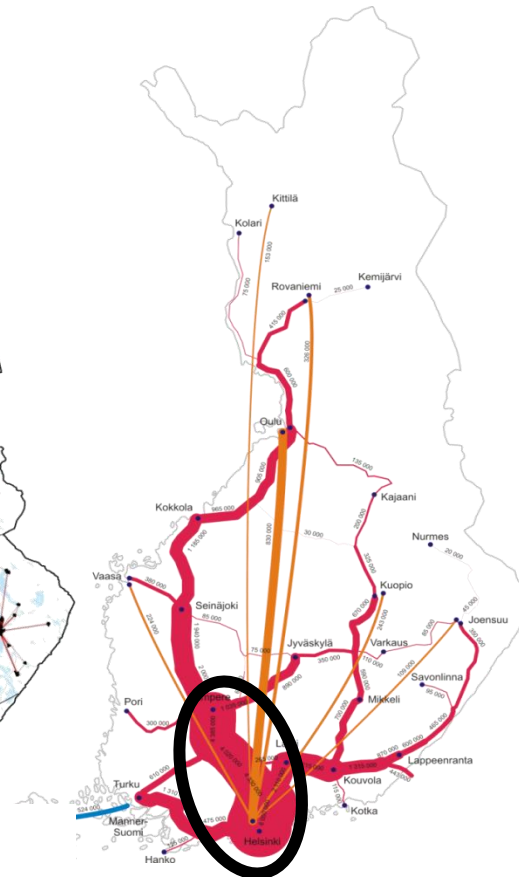

- The best testbed of ITS and MaaS

- Growth Corridor Finland area has organized itself in a new and unprejudiced way across regions and cities. This enables **easy contacting** within the GCF and its partners.
- Members of GCF are extremely **committed to MaaS**. MaaS is an important spearhead in GCF vision2020.
- GCF works in **close cooperation with ITS Finland, ITS Factory and the Ministry of Transport and Communications**.
- GCF has already **investigated basics for open data platform** that could support intelligent transport services and MaaS operators in the corridor. This includes making the inventory of open data in GCF area, the establishment of MaaS services.
- The Finnish Funding Agency for Innovation (TEKES) has had a separate funding call for MaaS operators and **GCF named as the best demonstration area in Finland**.

Growth Corridor Finland - the leading experimental platform on intelligent transport services and systems.
